Dear Mr Johnston

The other day I sent you a few plants from districts you are not likely to have travelled much of my duplicates are local the others have been distributed long ago & the locals you have in larger amount than I. have.

As I look over my things I shall lay aside duplicates for you

Yours most

N Davidson

I cannot separate Sedum dasyphyllifolium from S. anomalum in the dried state.

I do not know what they did with the old Sedum obtusatum
